

Proposed wireless panel antennas mounted to ex max and painted to match.

Recurring Revenue for Your Franchise Locations

There are several steps in the wireless communication process. MCF is willing to work with your franchise to provide any or all of the services required in order to maximize revenue from the carriers. We will jointly develop a scalable storewide process that could be utilized for each individual franchise site, regardless of which types of wireless radio equipment is proposed, including all supporting documentation. I have divided the process into each phase we handle pending how we jointly develop the responsibility matrix for working together.

Wireless Communication Process

- Marketing Phase

- Post Construction Phase

- Proposal Phase

- Payment Processing

- Permitting Phase

- Construction Phase
